CARRIÈRES DE MONTIGNY

This extraordinary site of stone quarries showcases the beauty of underground galleries, cave dwellings, and exceptional flora, alongside poignant reminders of soldiers' presence during the Great War.

The quarry workers and their families crafted their homes directly into the limestone, creating a unique living heritage. During the First World War, these quarries served as havens of rest, relaxation, care, and shelter for many brave French soldiers. Sculptures, inscriptions, and documents from this meaningful period still resonate today, making it a powerful place of remembrance for the First World War.

THE GREAT WAR

Our territory transformed into a pivotal battlefield during the First World War.

Its geographical features and proximity to key transport routes turned it into a strategic asset. From 1914 onward, this region witnessed fierce clashes as the front lines stabilised and both sides entered into a determined war of position. This era indelibly shaped the landscape: shell holes, trenches, quarries...

THE OURSCAMP ABBEY

Discover the storied past of Chiry-Ourscamp Abbey, a Cistercian sanctuary founded in 1129. With its roots tracing back to a foundation stone laid in 641 by Saint Eloi, advisor to King Dagobert, the abbey carries whispers of history and lore. The tale of a tamed bear adds a mystical touch, inspiring wonder and curiosity—myth or reality? This bear, a symbol of strength, watches over the site from its height, embodying the enduring spirit of the abbey. Shaped by centuries, it has witnessed both triumph and turmoil, having been pillaged during the Hundred Years' War and partially rebuilt in the late 16th century. Following the French Revolution, it transformed into a hospital and a magnificent cotton mill, and it bore witness to the challenges of the First World War. After enduring bombings in 1915, the abbey lay in silence until 1941, when the arrival of devoted monks breathed new life into its walls.
